IEEE 2024 International Conference on Software Services Engineering (SSE)

at the **2024 IEEE WORLD CONGRESS ON SERVICES**

<https://sse.conferences.computer.org/2024/>

Software as a service (SaaS) – a framework for encapsulating and delivering applications as services has been a great success primarily due to how it allows for cost-effective modular service requirements decomposition and modular service composition during the development, operation, maintenance, and evolution of the encapsulated software and the underlying computing platform. But software services are increasingly pressured to become more than just encapsulated code with a service interface. Demands abound for such services to be context and situation-aware, self- and peer-aware, autonomous and generative, mobile, fine-grained, trustworthy, and intelligent.

SSE 2024 welcomes papers on any topic in software services engineering, in particular those related to:

- Human in SSE
- IoT: Context Awareness & Autonomy
- NextGen SSE
- Intelligent Operations
- Industrial SSE

Additional details on this hybrid event are available on the website. IEEE SSE was known previously as IEEE SCC.

2024 SSE General Chairs

Sumi Helal, University of Florida

2024 SSE Program Chairs

Tiberiu Seceleanu, Malardalen University

Yanchun Sun, Peking University

Javier Berrocal, University of Extremadura

Authors are invited to prepare early and submit original papers to any of these conferences at www.easychair.org. All submitted manuscripts will be peer-reviewed by at least three reviewers. Accepted and presented papers will appear in the conference proceedings published by the IEEE Computer Society Press. The use of content generated by artificial intelligence (AI) in an article (including but not limited to text, figures, images, and code) shall be disclosed in the acknowledgments section of any article submitted to an IEEE publication. The AI system used shall be identified, and specific sections of the article that use AI-generated content shall be identified and accompanied by a brief explanation regarding the level at which the AI system was used to generate the content.

IMPORTANT DATES - EASYCHAIR

UPDATED:

Due for final submission (new or revision)

April 7, 2024

Acceptance notification

May 13, 2024
